

JOIN A NETWORK OF HOSPITALS AND INDUSTRY WORKING TOWARDS DEEP GREENHOUSE GAS EMISSIONS REDUCTIONS IN HEALTHCARE FACILITIES

Membership in Greening Health Care connects hospitals to a community of practice providing:

Energy Assessment

Annual Energy Assessment Report and focused review meeting addressing energy, water and emissions performance and savings opportunities.

Annual Forum

In-person Annual Forum with healthcare executives, peers, and solution providers.

Workshops and Webinars

Regular workshops and webinars presenting performance results, technologies and case studies.

Cohort Projects

Opportunities to participate in applied research projects with other hospitals and industry experts to develop and test best practices.

News that Matters

Regular updates on government regulations, utility company resources and incentives and funding opportunities.

Data Management

Full use of the GHC member EMIS. Data retrieval and online benchmarking and savings reporting with support for government reporting regulations.

From Data to Action

Quarterly savings reports and review meetings to highlight opportunities, reinforce savings and address setbacks.

Recognition and Celebration

Awards and recognition including the 5% Savings Club and onsite presentations to staff.

Act on your hospital's commitment to fighting climate change
by joining **Greening Health Care** today!
