

Greening Health Care 2025 Events Schedule

Our webinars and in-person events will be focused on ways for healthcare organizations to make immediate savings in energy, costs, and emissions. Be sure to visit our events site www.greeninghc.com/events throughout the year for any programming updates and changes as well as recordings of completed events.

Webinar: Recommissioning Hospital Ventilation, Heating, and Cooling Systems

Starting the journey to energy efficiency can be challenging, especially when dealing with aging infrastructure and limited funding. We will learn from hospital facilities staff how they have successfully recommissioned their ventilation, heating, and cooling systems. By focusing on low-cost measures, these hospitals are uncovering valuable opportunities to reduce energy consumption, improve patient comfort, and overcome the challenges of aging facilities and tight budgets.

Wednesday, March 5, 2025: 12:30 pm – 1:30 pm EST

Webinar: Low Carbon Planning – Heat Recovery Chillers, Enthalpy Wheels and Adiabatic Humidification

Delve into the complexities of installing Heat Recovery Chillers (HRCs) in existing healthcare facilities in this one-hour webinar, providing practical guidance on preparing infrastructure, space, and system compatibility for integration. Emphasis will be placed on optimizing thermal wheel efficiency, with strategies to enhance performance and energy recovery. The benefits of both HRCs and thermal wheels will be discussed, highlighting their role in reducing energy consumption, cutting emissions, and improving overall building performance. Key challenges in heat recovery will be explored, alongside actionable solutions for overcoming them.

Wednesday, April 23, 2025: 12:30 pm – 1:30 pm EDT

Summer Workshop: Decarbonizing Existing Facilities Through Energy Efficiency, Capital and Asset Planning, and Industry Partnerships

We focus on decarbonizing existing hospitals, beginning with low-cost energy efficiency and recommissioning measures for immediate impact. Attendees will learn how to enhance redevelopment processes by integrating energy efficiency standards that reduce emissions. The discussion will also emphasize the importance of aligning asset management with facility strategy and corporate sustainability goals to support long-term decarbonization efforts.

Additionally, the event will explore how to develop strategic partnerships with the industry to drive performance, challenge the status quo of service-level agreements, and align them with high-performance targets. Practical advice will be provided for optimizing major equipment such as boilers, chillers, air handling units, and controls to ensure they contribute to energy efficiency and emissions reduction.

Monday, June 23, 2025: 8:00 am – 3:00 pm EDT

Tickets can be purchased from our site's event page once they become available.

Webinar: Energy Leaders – Case Studies on the Top Five Energy Conservation Measures

We highlight the top five energy conservation measures that healthcare facilities can adopt to significantly reduce energy use and enhance operational efficiency. Topics include upgrading building systems, optimizing HVAC performance, implementing lighting retrofits, and leveraging energy-saving technologies. Discussions will focus on strategies for overcoming common barriers such as financial constraints and technical challenges. Guidance on workforce preparation and stakeholder engagement will be provided, alongside insights into how data-driven decision-making can identify new areas for energy savings.

Wednesday, September 10, 2025: 12:30 pm – 1:30 pm EDT

Webinar: Designing Effective Procurement Models for Decarbonization

Develop procurement models that align with energy conservation objectives in healthcare facilities. Key topics include setting clear decarbonization targets from the outset, adopting prescriptive scoping methods to replace end-of-life assets with energy-efficient solutions, and leveraging financial models like pain-share, and gain-share to drive stakeholder alignment. The session will also cover best practices for monitoring progress through measurement and verification and savings tracking, ensuring that decarbonization goals are met while maintaining transparency and accountability.

Wednesday, October 15, 2025: 12:30 pm – 1:30 pm EDT

GHC Forum 2025: From Words to Action to Results

Westin Harbour Castle, Toronto

We will explore the integration of decarbonization strategies into the design and redevelopment of healthcare facilities, particularly new hospitals. Industry leaders will discuss advancements in energy-efficient technologies and the latest trends in building designs that promote

sustainability. Hospital panels will also cover procurement strategies focused on energy performance, cost-effectiveness, and long-term sustainability in hospital redevelopment projects. Learn how to navigate procurement processes that align with decarbonization goals while addressing financial challenges and maximizing long-term impact.

Monday, November 24, 2025: 8:00 am – 6:00 pm EST

Tickets can be purchased from our site's event page once they become available.

Sponsorship Opportunities

We offer sponsorship opportunities for our webinars and in-person conferences, as well as exhibitor booth spaces at the in-person events.
